

915MHz Patch Antenna
Part Number: SPCBD-S102-07D

Features

- 915MHz Center Frequency
- 50 Ohm Impedance
- VSWR: 1.03
- Return Loss: -40dB
- Bandwidth: ~7MHz
- Gain 3.3dBi
- Single Patch Design
- *Vertical Polarization
- SMA Connector
- Operating Temperature:
-65°C to 165°C

Product Link:

Applications

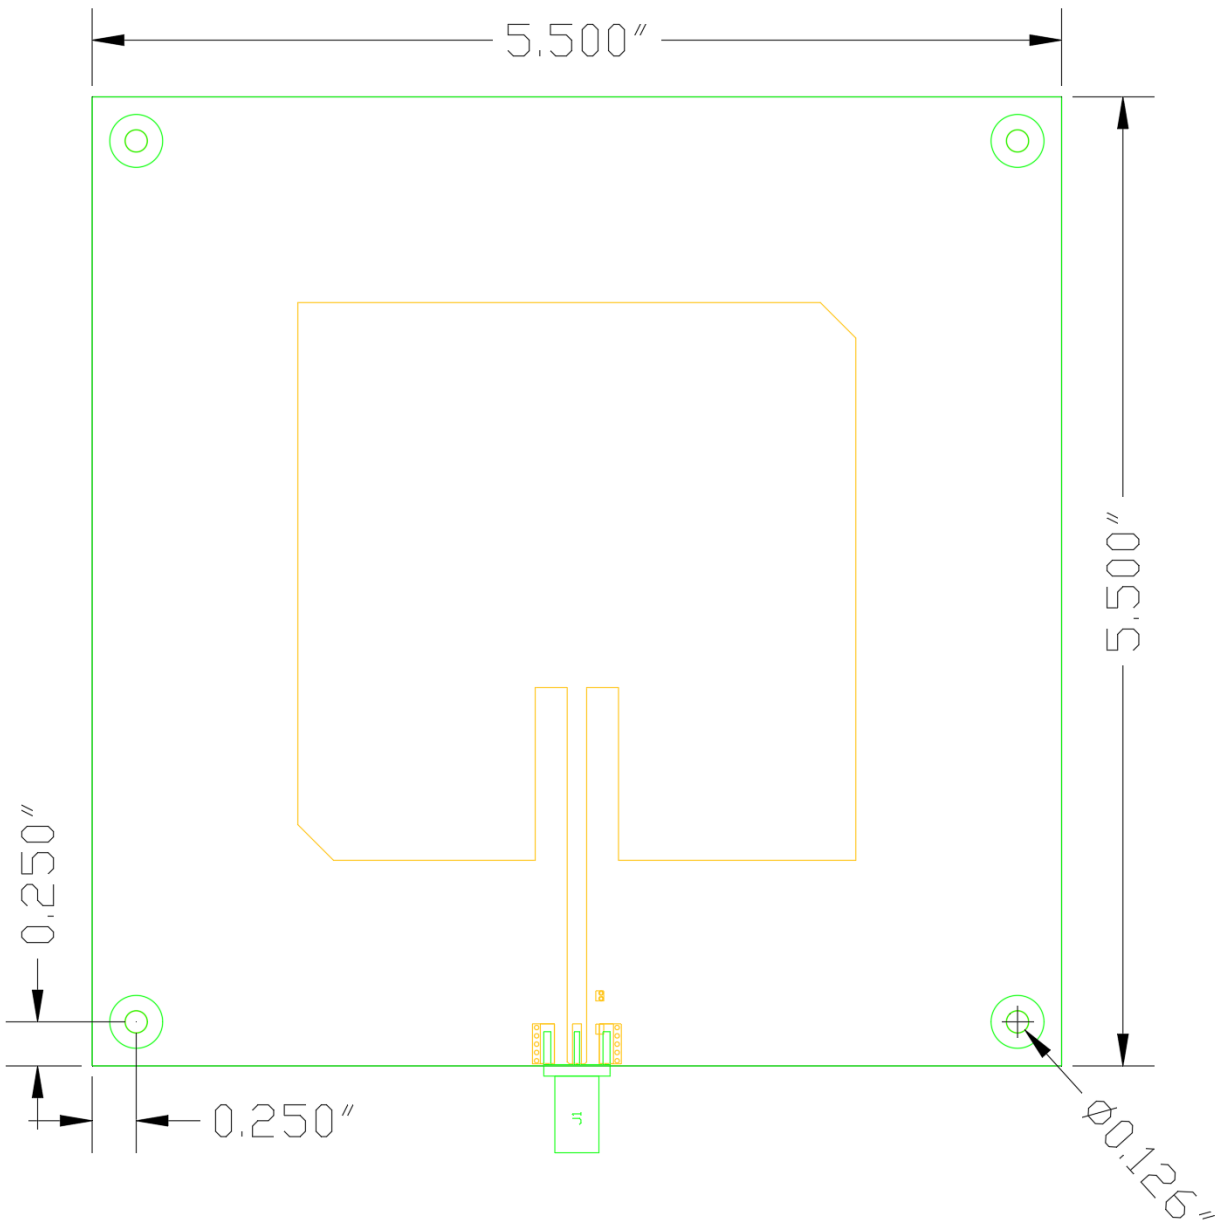

- ISM Band radios
- Back-scatter type RFID systems

Description

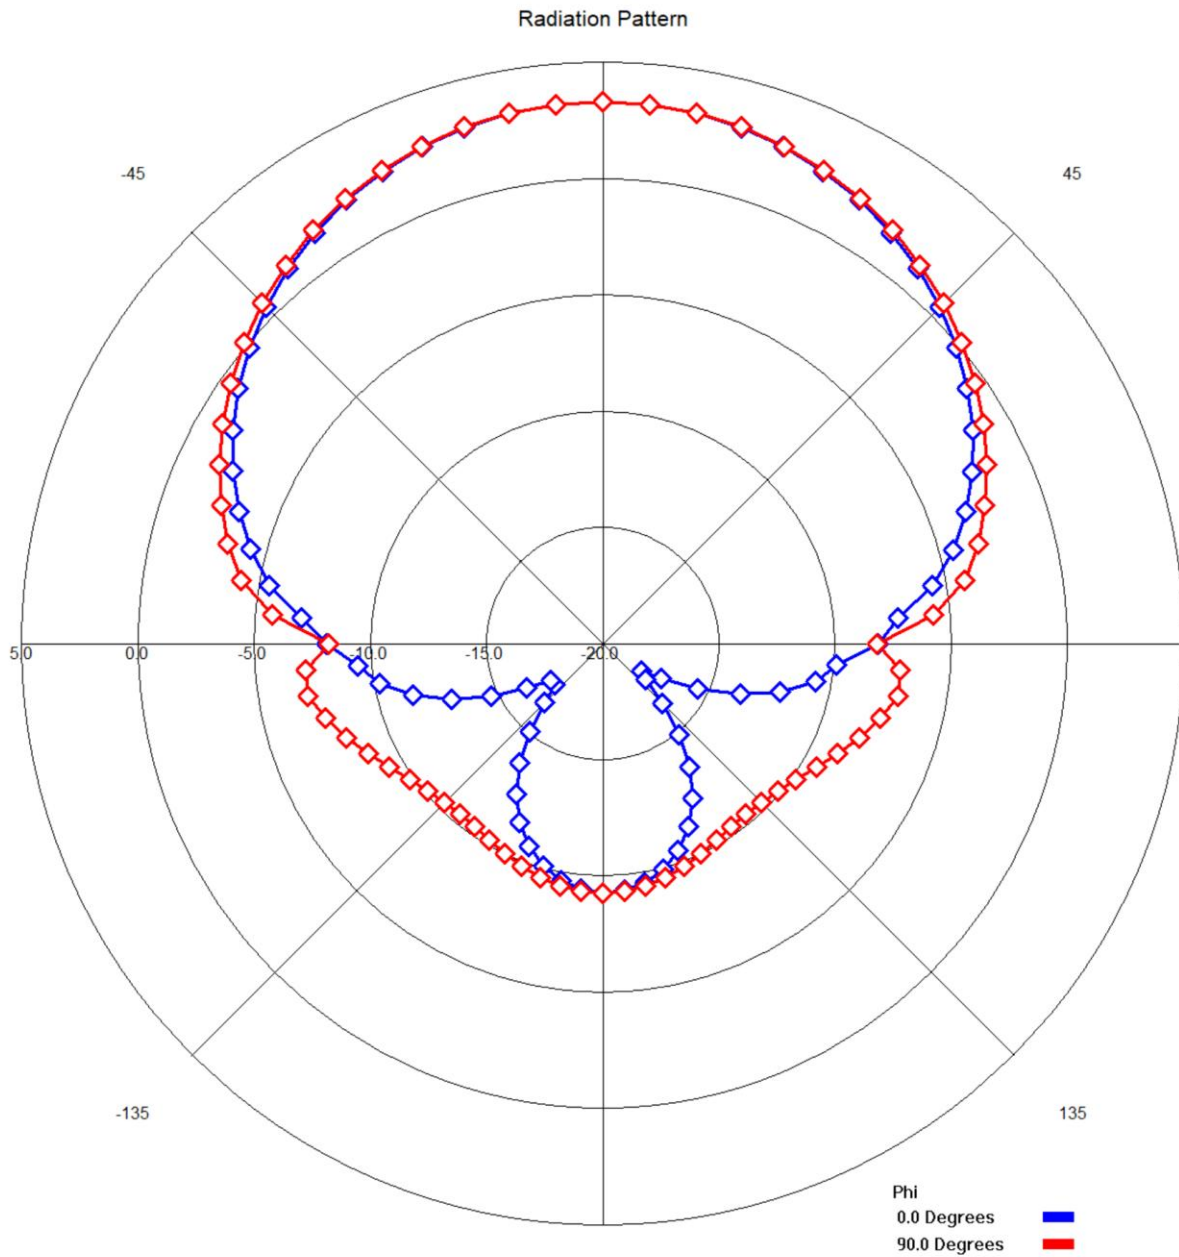

The SPCBD-S102-07D is a low-cost solution for ISM band applications as well as back scatter type RFID systems that require a high-performance antenna. It utilizes a single patch design with a 915MHz center frequency and is manufactured using high temperature [Kappa 438](#) for durability in extreme conditions.

Dimensions

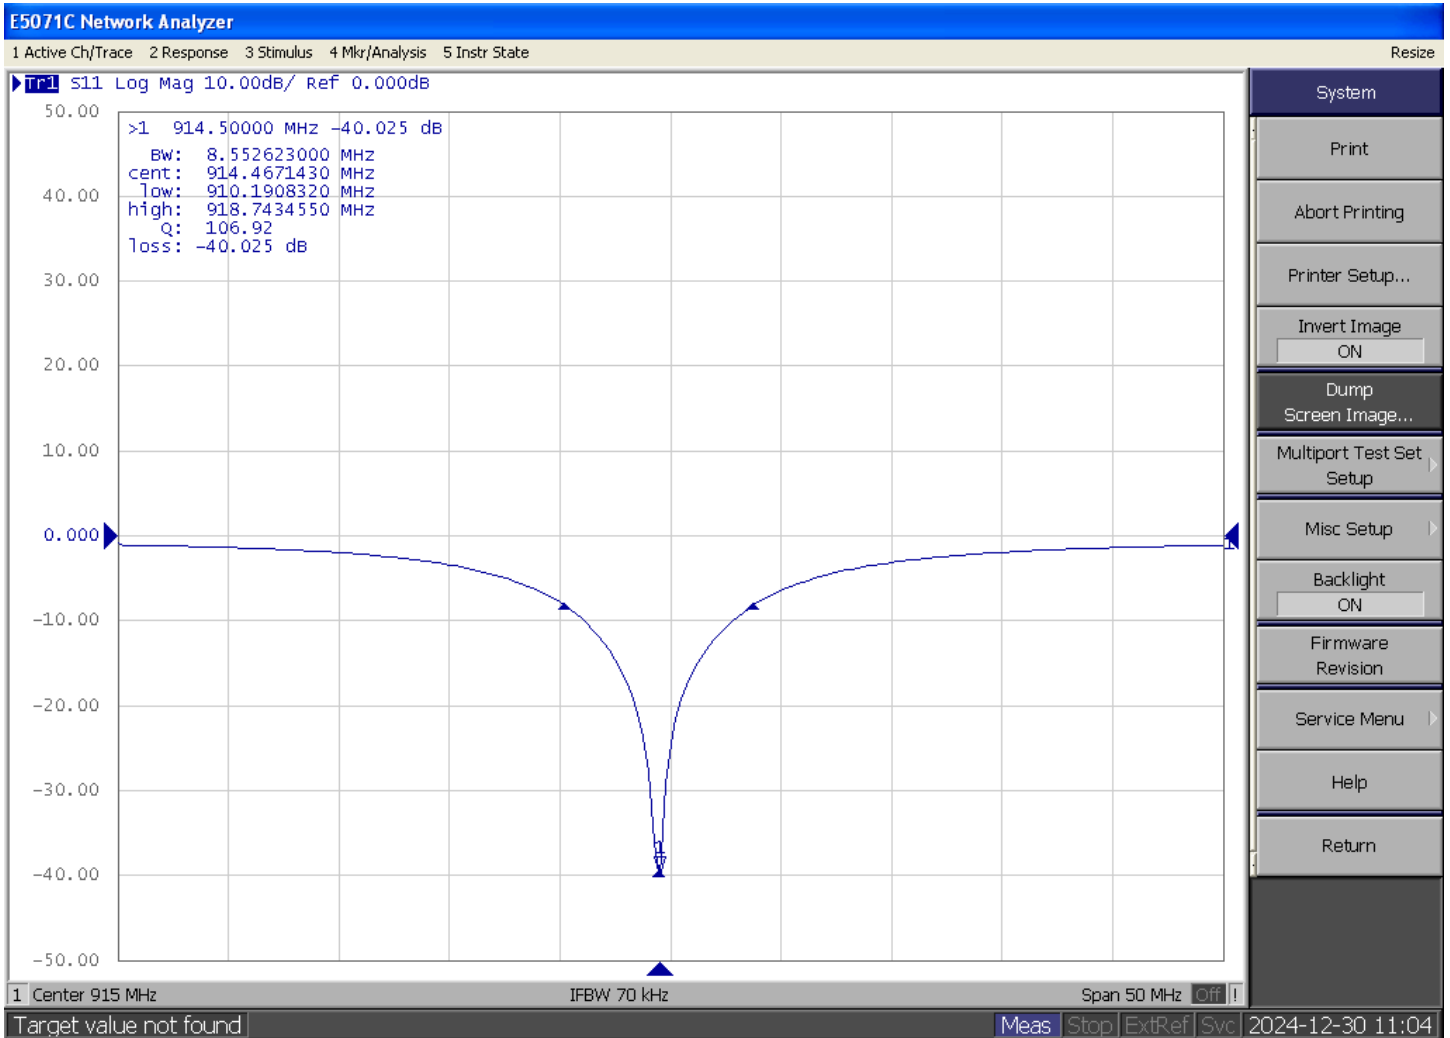

L•W•H: 5.5"•5.5"•0.062"

Radiation Pattern (simulated)

Patch Antenna Measurement

*Two corners of the antenna have been cut to induce circular polarization.
